To submit bug reports

-
1. Login to your account portal on our website
<http://www.fpotech.com/fpotech/login.php> and then go to the Support Incident Menu and submit an incident request.
 2. EMail them to support@fpotech.com including the text "Bug Report" with the version # and your filePro License # in the subject line
 3. FAX them to (813) 354-2722 clearly marking them as bug reports and be sure to reference your filePro License #
 4. Call the customer support number (800) 847-4740

We wish to thank Jim Asman for sending us an entire set of HP printer tables for inclusion in this release. You might wish to send him a note of appreciation to root@spectra.wimsey.com Please view Jim's readme file which has been placed in your fp\lib directory for any special notes about these printer tables.

It's important that you clearly describe a suspected bug and include the filePro version number. If the programmer has trouble figuring out what you meant, you might as well not have reported the bug. Be very specific. For example, if you are reporting a bug concerning a Browse, identify if it is a lookup browse or browse created by using the [F6] key. A screen shot is very helpful and sometimes better than more than 1000 words.

Describe exactly how to duplicate the bug. Although it's sometimes difficult to create a working sample to demonstrate the problem, make every effort to trim down your code and provide a working sample application with test data. You may even discover that what you thought to be a bug is due to a coding error or the bug may only occur with lots of data or large processing tables.

Take good notes as to any error messages and under what circumstances the error message is presented. It never hurts to provide more information rather than not enough. This is particularly true when the programmer asks for additional information. Rather than responding with a single sentence, be verbose since this may shed some light on the bug or what you may be doing wrong in your code.

Read what you wrote. Closely read your bug report before submitting to make sure it's clear and complete. If you have listed steps for duplicating the bug in a sample, exercise the sample with the listed steps to make sure you haven't missed a step.

Version 6.0.XX.01 New Items
=====

Task # 1601 (All)

Added @exit label to *clerk processing. This is executed whenever a record is exited or broken out of. Events that trigger this are 'X' while not in update mode, 'BRKY' while not in update mode, and 'exit' in processing. It is the opposite of @entsel, and is the last thing executed when leaving a record. Assignment of real fields is not allowed, this is similar to @once in that the processing that is executed is NOT sitting on a record, but rather record '0'.

Task # 1606 (All)

Partial lookup flag added to *cabe lookup wizard.
-O on an exact lookup now does partial key matching. This kills a lookup once the beginning of the key value no longer matches the lookup key value.

Task # 1546 (All)

BUSYBOX

```
BUSYBOX "my message"  
BUSYBOX("10","10")  
BUSYBOX("10","10") "my message"
```

=====
Version 6.0.00.01 bug fixes
=====

Task #1607 (All)

Removed double F7 label

Task #1608 (All)

dosetforms - replace toggle with select all / select none

Task #1386 (All)

Display when index is built on selection set.

Task #1619 (All)

Fixed changing Broken mirror status to Yes mirrored status
in define files.

Task #1620 (NIX)

Correct error to redirected stdin

=====
Version 6.0.00.00 bug fixes
=====

Task #1128 (GI)

F6 was not working from pmaint to select Windows printers.

Task #1165 (All)

Better error handling when indexes are in a known need to
rebuild state.

Task #1239 (All)

MySQL/ODBC was returning a -1 error on longblobs. The problem was caused
by the precision being reported as -1.

Task #1255 (GI)

GI now traps no password in user.cfg file

Task #1310 (GI)

GIservr now handles HD Serial Number with or without dashes

Task #1407 (All)

xx = @odbcexception.clear crashes filePro

Task #1571 (GI)

Occasional broken lines were drawn

Task #1569 (GI)

GIservr was missing some shutdown messages

=====
End End End End End End End End End
