## fp2RTF Install

1. Check the fp2RTF Update option from the fP Launcher.
2. The Program License Agreement will appear. Read the message and click on **Yes**, if you accept all of the terms.
3. The default installation destination folder for fp2RTF Update will appear next. If you want to change this location, click on the **Browse** button. A **Choose Folder** file selection window will appear. Enter the path you want for the fp2RTF Update. The path must end with \fp.

Note: If you have just installed filePro, fp2RTF will look for the location of the filePro install and set the path for you.

4. When **Setup Complete** screen appears, click on **Finish** to complete the fp2RTF Update setup when all setup options are complete, click on **Finish** to complete the setup and exit.

Note: When upgrading, depending on the last version of filePro that has been installed, you may have to identify the location of the ~/fp and ~/filePro directories on your system. Make sure to include the correct location of these directories during the install to properly set your program and data paths.
